# ABOUT US

Dixafinance is a global systematic investment platform. Our centralized research focuses on the development of advanced quantitative techniques for uncovering market opportunities and employs them within a disciplined framework that results in efficient exposures.

With a robust infrastructure and talented investment professionals, Dixafinance offers clients the scale of a large asset management firm, with the benefits of a versatile investment platform – flexibility and customization. Our firm is able to offer institutional and retail investors the essential building blocks for today's changing investment landscape.

Using advanced methods of making business and a personal approach to each investor, we propose a novel financing example to people who want to maximize earnings, but also as a strong source of solid returns.

Dixafinance company uses only advanced trading tools and trades at the most steady markets, which minimizes the uncertainty of financial loss to investors and guarantees them a steady income accrued every calendar day.

## **OUR PRINCIPLES AND AMBITIONS**

WE APPROACH SUSTAINABILITY FROM THREE PERSPECTIVES: AN ASSET OWNER, AN ASSET MANAGER, AND AS A COMPANY IN OUR OWN RIGHT

As an asset manager, we must aim to deliver the financial outcomes and any sustainability requirements set out in the objectives of each of our mutual funds, or in the mandates we receive from institutional clients.

Sometimes there may be differences in the sustainability criteria that external clients mandate, and in turn these may differ from the requirements of our internal client.

While our values of care and integrity inform all our sustainability work, the asset manager and asset owner are separately regulated businesses with independent Boards and governance processes, and their policies may diverge on occasion.

For example, if we think that a certain industry does not have a sustainable future, we may require that the asset manager does not invest in that industry. Our responsibility as an asset owner is to create the best customer outcome in terms of general well-being in line with our fiduciary duty, taking into consideration financial security.

### **Customer led**

We aim to: be relevant, innovative and accessible; meet customer demand for sustainability and impact solutions; communicate clearly about our products, policies, processes and potential outcomes.

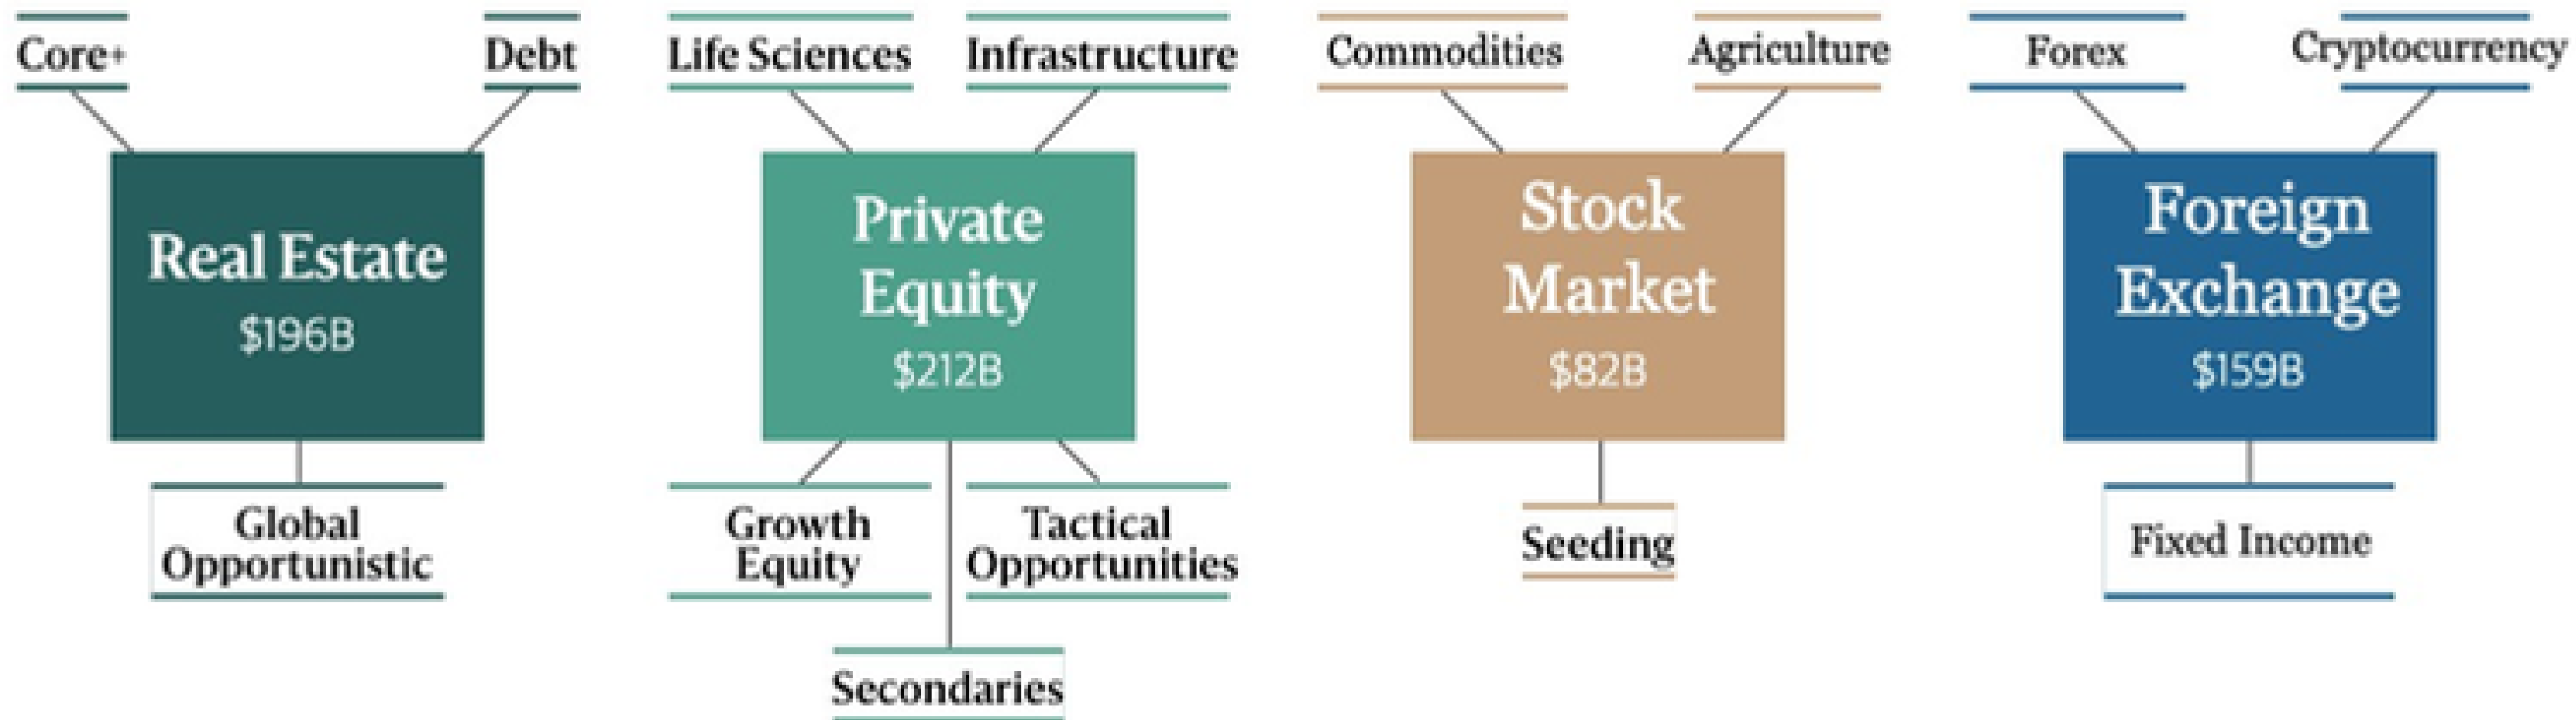

### **Capability enabled**

We will use: world class people, research and proprietary tools and data to understand ESG risks and identify opportunities across all asset classes; our influence as a leading active investor to advocate for sustainable performance; our financial strength to make investments which create positive change.

### **Sustainably delivered**

We will do this with: an inclusive, accountable culture focused on our purpose and our values of care and integrity; sustainability embedded in all we do, from customer service to risk management.

We continue to build on our track record to innovate into new strategies, drive growth, and serve our investors.
